Dear The Federal Communications Commission,

Congratulations on your appointment to Chair the FCC. I have received suggestions from various calling services that I e-mail you in regards to cost realignment/reassignment of the Universal Service Fund (USF), and specifically to ask your support of The Fair Share Plan. To be honest, I don't fully (or even partially) understand the issues involved, though apparently a current proposal would reduce rates for businesses and increase rates for low-level personal users of tele-communication services. I am fairly conservative and a great supporter of President Bush, and I am not of the "make business pay" kind of mindset. I am satisfied with the favorable rates I pay for long distance service using pre-paid AT&T calling cards, and I accept the fairly high cell phone roaming charges during the times I need to use that. If you are advocating to raise rates for small-time users such as myself, please respond to this e-mail and tell me your rationale.

Thank you

cc: Marlene Dortch, Secretary
